Contents

Letters to the Editor

The effect of mass loss on the evolution of low-mass post-AGB stars
Trams, N.R., Waters, L.B.F.M., Waelkens, C., Lamers, H.J.G.L.M., van der Veen, W.E.C.J. L1

Irregular structure of the envelope around the carbon-rich star TX Psc
Heske, A., te Lintel Hekkert, P., Maloney, P.R. L5

Strong lithium in the very nearby K-dwarf HD 17925
Cayrel de Strobel, G., Cayrel, R. L9

SS 433 – the puzzle continues
Brinkmann, W., Kawai, N., Matsuoka, M. L13

The distance and evolutionary phase of the Luminous Blue Variable AG Car
Humphreys, R.M., Lamers, H.J.G.L.M., Hoekzema, N., Cassatella, A. L17

Discovery of strong maser emission from HCN in IRC+10216
Lucas, R., Cernicharo, J. L20

Cosmology

Simulations of galaxy formation in tidal fields
Voglis, N., Hiotelis, N. 1

How to determine a Tolman-Bondi universe from ideal observable and theoretical relations
Rindler, W., Suson, D. 15

Correlations in the absorption lines of the quasar Q0420-388
Hongguang Bi, Börner, G., Yaoquan Chu 19

Extragalactic astronomy

CO $J=2\rightarrow1$ core mapping of the star-burst galaxy M 82
Phillips, J.P., Mampaso, A. 24

A model of spiral-galaxy evolution. II. Toward an understanding of the Hubble sequence
Galli, D., Ferrini, F. 31

CO along the minor axis of M 31
Sandqvist, Aa., Elfhag, T., Lindblad, P.O. 39

(RN) Long-term optical colour and spectral index variability of OJ 287
Takalo, L.O., Sillanpää, A. 45

Distribution and motions of atomic hydrogen in lenticular galaxies. VIII. The S0/a galaxies NGC 3619, 3626, and 3900
van Driel, W., Balkowski, C., van Woerden, H. 49

The correlation between radio and far-infrared emission for disk galaxies: a calorimeter theory
Völk, H.J. 67

The luminous quasar HS 1700+6416 and the shape of the "big bump" below 500 Å
Reimers, D., Clavel, J., Groote, D., Engels, D., Hagen, H.J., Naylor, T., Wamsteker, W., Hopp, U. 71

Galactic structure and dynamics

Large-scale properties of interstellar dust and gas in M 33
Deul, E.R. 78

Formation, structure and evolution of stars

Numerical simulation of acoustic instabilities in thin accretion disks
Kaisig, M. 89

Numerical simulation of the formation of shock waves in thin accretion disks and the resulting angular momentum transport
Kaisig, M. 102

Orbital elements for double stars of Population II. The double-line high-velocity system HD 113083
Lindgren, H., Ardeberg, A., Zuiderwijk, E. 111

Spectroscopic identification of white dwarfs in galactic clusters. V. NGC 3532
Reimers, D., Koester, D. 118

The synthesis of ^{26}Al in massive stars
Walter, R., Maeder, A. 123

The birthrates of galactic low mass binary radio pulsars and their progenitor systems
Coté, J., Pylyser, E.H.P. 131

VLA detection of radio emission from a dwarf nova
Benz, A.O., Güdel, M. 137

Studies of late-type binaries. II. The physical parameters of VW Cephei
Hill, G. 141

Studies of late-type binaries. III. A spectroscopic study of V 566 Ophiuchi
Hill, G., Fisher, W.A., Holmgren, D. 152

Erratum: Spots on T Tauri stars
Bouvier, J., Bertout, C. 337

Stellar atmospheres

(RN) Analytical expressions for the Rosseland-mean opacity and electron scattering in stellar atmospheres
Burger, P., Lamers, H.J.G.L.M. 161

Determination of the absolute flux from Vega at 2.250 μm
Booth, A.J., Selby, M.J., Blackwell, D.E., Petford, A.D., Arribas, S. 167

A study of M Mira variables based on IRAS LRS observations. I. Dust formation in the circumstellar shell
Onaka, T., de Jong, T., Willems, F.J. 169

A survey of F-type stars
Jaschek, M., Andrillat, Y., Jaschek, C. 180

X-ray and optical observations of LDS 587
Pasquini, L., Schmitt, J.H.M.M., Harnden, Jr., F.R., Tozzi, G.P., Krautter, J. 187

(RN) Long-lived active longitudes on the spotted RS CVn star σ Geminorum
Olah, K., Panov, K.P., Pettersen, B.R., Valtaoja, E., Valtaoja, L. 192

Hα versus X-ray luminosity in dwarf M stars
Doyle, J.G. 195

Spectrophotometry of faint Wolf-Rayet stars
Lundström, I., Stenholm, B. 199

Theoretical aspects of two α-distributions in accretion disks
Adam, J., Störzer, H., Duschl, W.J. 205

(RN) Optical observations of the "frosty" Leo nebula (IRAS 09371+1212)
Mauron, N., Le Borgne, J.-F., Picquette, M. 213

Diffuse matter in space (including HII regions and planetary nebulae)

(RN) The division of diffuse interstellar bands into families
Westerlund, B.E., Krełowski, J. 216

IRAS observations of the star-forming dark cloud ESO 210-6 A and the associated near-infrared source HH 47/46 IRS
Sahu, M., Sahu, K.C., Pottasch, S.R. 221

Dust ring around λ Orionis
Zhang, C.Y., Laureijs, R.J., Chlewicki, G., Clark, F.O., Wesselius, P.R. 231

(RN) A newly discovered compact planetary nebula
Cappellaro, E., Turatto, M., Sabbadin, F. 241

The reflection nebula around HD 26676
Centurion, M., Vladilo, G. 243

Carbon monoxide emission from the Ring Nebula in Lyra
Bachiller, R., Bujarrabal, V., Martin-Pintado, J., Gómez-González, J. 252

A CO $J=2\rightarrow1$ survey of type I post-main-sequence nebulae
Phillips, J.P., Mampaso, A. 257

(RN) New near-IR photometry of southern planetary nebulae
Preite-Martinez, A., Persi, P. 264

IRAS 16455-3455 and IRAS 15154-5258: two new southern planetary nebulae
Manchado, A., García-Lario, P., Pottasch, S.R. 267

Spectroscopic search for halos of planetary nebulae
Bässgen, M., Grewing, M. 273

The EXOSAT view of the north and east Cygnus Loop
Ballet, J., Rothenflug, R. 277

(RN) Arcs around SN 1987A
Katz, J.I. 289

(RN) Suprathermal ionization in evaporating clouds. Nonlocal electron distribution function
Ballet, J., Luciani, J.F., Mora, P. 292

The Sun

Solar equatorial plasma rotation from 1983 until 1986
Lustig, G., Wöhl, H. 299

The solar system

A 120-day oscillation in the solar activity and geophysical phenomena
Djurovic, D., Pâquet, P. 302

Post-perihelion observations of comet P/Halley at $r=8.5$ AU
West, R.M., Jørgensen, H.E. 307

On the lost minor planet (719) Albert
Kristensen, L.K., West, R.M. 317

Celestial mechanics and astrometry

The transformation of coordinates between the systems of B1950.0 and J2000.0, and the principal galactic axes referred to J2000.0
Murray, C.A. 325

Physical and chemical processes

Efficient computation of electron-electron bremsstrahlung emission in a hot thermal plasma
Haug, E. 330

Instruments, data processing, and computational methods

The determination of the neutrino mass in neutrino astronomy
Roos, M. 334

Abstracts of articles which have been published in A. & A. Suppl. Ser. 78, No. 1, and 78, No. 2

The variable Herbig Ae star HR 5999. VIII. Spectroscopic observations 1975–1985 and correlations with simultaneous photometry
Tjin A Djie, H.R.E., Thé, P.S., Andersen, J., Nordström, B., Finkenzeller, U., Jankovics, I. 338

UBV photometry and the structure of the galactic cluster NGC 2516
Dachs, J., Kabus, H. 338

Stark broadening of He II lines
Schöning, T., Butler, K. 339

Globular clusters in the Large Magellanic Cloud: CCD photometry of NGC 1866
Chiosi, C., Bertelli, G., Meylan, G., Ortolani, S. 339

Estimation of stellar intrinsic colours, distances and colour excesses based on the Strömgren and Hβ photometry of 804 B, A, and F stars in 10 selected areas
Franco, G.A.P. 339

Orbital elements of twelve visual binary stars
Baize, B. 339

Observations on the variability of linear polarization in late-type dwarf stars
Huovelin, J., Linnaluoto, S., Tuominen, I., Virtanen, H. 340

Optical positions of radiostars. I
Costa, E., Loyola, P. 340

Spectroscopy of poorly known northern dwarf novae. Part I
Bruch, A. 340

Infrared spectroscopy of astrophysical ices: new insights in the photochemistry
Grim, R.J.A., Greenberg, J.M., de Groot, M.S., Baas, F., Schutte, W.A., Schmitt, B. 341

Positions of southern open cluster stars proposed for the HIPPARCOS mission
Tucholke, H.-J. 341

UBVβ photometry of luminous early-type stars and emission-line stars in the Southern Coalsack region
Westerlund, B.E., Garnier, R. 341

Confirmation of the Galactic Thick Disk Component by the Basle *RGU*- and *UBV*-photometric space densities. I
Fenkart, R. 342

New proper-motion stars south of declination −40° and right ascension between 00 h and 04 h 30 m
Wroblewski, H., Torres, C. 342

Photometric calibration of the APM Proper Motion Project
Evans, D.W. 342

A wide angle redshift survey of the Hydra-Centaurus region
Fairall, A.P., Vettolani, G., Chincarini, G. 343

The DRAO Galactic plane survey. I. $l=140°$, $b=0°$
Green, D.A. 343

A catalogue of expansion velocities of galactic planetary nebulae
Weinberger, R. 343

The surface gravities of Ap stars: spectroscopic estimates from Hβ profiles and comparison with photometry
North, P., Kroll, R. 343
